Greenphire Clinical Finance

Budgeting & Benchmarking

The Greenphire Clinical Finance suite of products work together to streamline clinical trial financial management, improve financial predictability, and strengthen site relationships. The Budgeting & Benchmarking solution accelerates the budget build and negotiation process using robust fair market value data, speeding up study startup. Once a budget is finalized, the Site Payment solution delivers enhanced control and visibility, enabling timely, transparent, and accurate disbursement of funds to research sites around the world.

Budgeting & Benchmarking: Build defensible budgets with contemporary FMV data

The Budgeting & Benchmarking solution provides a powerful, data-driven foundation for investigator grant budgets. Generate accurate budget estimates for each study based on the industry's most trusted fair market value (FMV) dataset on site costs. Navigate from protocol to a defensible estimate with confidence and speed, empowering teams to align stakeholders and accelerate negotiation cycles.

Benefits of Data-Driven Budgeting

Achieve Budgetary Confidence

Anchor your financial planning in objective, contemporary data. Build trusted and defensible budget estimates.

Accelerate Negotiation Cycles

Present sites with a fair, data-backed starting point to eliminate unnecessary delays and reduce negotiation cycle times. Achieve first patient in faster.

Master Global Cost Variations

Build budgets for your global trials with benchmark data from over 70 countries, keeping your estimates accurately tailored to each region's economic landscape.

Optimize Resource Allocation

Free your clinical finance and operations teams from the time-consuming task of sourcing cost data, empowering them to focus on strategic planning and analysis.

Key Features

- Direct FMV cost sourcing
- Intuitive spreadsheet-like design
- Copy/paste protocol Schedule of Assessments from excel
- Build multiple scenarios, treatment arms, and cohorts
- Export country and site-level budgets
- Allocate budgets across sites and unique payees within a site

Contemporary Global FMV Data

- Dataset updated quarterly
- Sourced from 100+ sponsors & 30+ CROs
- Data from 30,000+ unique payees
- Global benchmarks from 70+ countries
- CPT code library layered with 250+ proprietary research codes
- Quartile and 90th percentile values

Automated Payments to Streamline and Scale Financial Operations

The Site Payments solution automates invoices and payments to streamline and scale your financial operations, turning site payments into a top-performing function of your business. Our built-for-purpose technology supports regional preferences and regulatory requirements, instilling confidence that your sites around the world will be paid on time, accurately, and with reduced administrative burden—driving site sustainability and overall trial efficiency.

Benefits of Site Payments

Reduced Time & Effort

Invoice and payment automation significantly reduces the administrative workload for sites, CROs, and sponsor teams.

Improved Site Experience

With reduced effort and on-time, transparent payments, you can boost site satisfaction and strengthen relationships.

Regional Flexibility

Meet sites where they are and support region-specific processes and requirements, such as variable split payments and taxes.

Financial Control & Visibility

Robust reporting and just-in-time funding provides complete transparency and control over cashflow.

Global Expertise

Experience-based consultation helps sponsors optimize and scale site payment execution worldwide.

Key Features

- Automated, compliant invoicing and payments
- CTA-based configuration
- eClinical integration capabilities (e.g., EDC, CTMS, ERP)
- VAT/global tax management
- Local language site and sponsor portal
